Introduction	1
Part I	
"Reading" a whole-inch measurement when the right edge of an object lies <i>on</i> a line and its left edge is:	7
• aligned with the zero-line of the ruler	7
• <i>not</i> aligned with the zero-line of the ruler	12
Part II	21
Reducing ruler fractions to lowest terms	
Creating equivalent fractions	
Part III	
"Reading" a fractional-inch measurement when the right edge of an object lies <i>on</i> a line and its left edge is aligned with the zero-line of the ruler	29
Part IV	
"Reading" a fractional-inch measurement when the right edge of an object lies <i>between</i> two lines and its left edge is aligned with the zero-line of the ruler	49
Part V	
"Reading" a fractional-inch measurement when the right edge of an object lies either <i>on</i> a line or <i>between</i> two lines and its left edge is:	67
• aligned with the zero-line of the ruler	
• <i>not</i> aligned with the zero-line of the ruler	
Part VI	
Summary: Connecting fractions to the lines between the whole-inch numbers	77
Part VII	
"Reading" a fractional-inch measurement in <i>feet and inches</i> when the left edge of an object is aligned with the zero-line of the ruler	93
